CONTENTS

Volume 32 Number 1 February 1997

1 Effects of air flow-rate on flavour release from liquid emulsions in the mouth *Marcus Harrison & Brian P. Hills*

11 The influence of mash pre-aging on the development of the flavour-active compound, 4-hydroxy-2(or5)-ethyl-5(or2)-methyl-3(2H)-furanone (HEMF), during soy sauce fermentation *Yasuo Hayashida, Kenryo Nishimura & J. Colin Slaughter*

15 Effect of 5-caffeoylquinic acid on soybean oil oxidative stability *Magda R. Luzia, Karla C. C. da Paixão, Roberto Marcílio, Luiz C. Trugo, Leila M. C. Quinteiro & Carlos A. B. de Maria*

21 Inhibition of yeast growth in grape juice through removal of iron and other metals *Minhua Feng, Brandan Lalor, Shuwei Huh, Jia Mei, Ann Huber, Denis Kidby & Bruce Holbein*

29 Effect of natural fermentation on *in vitro* zinc bioavailability in cereal–legume mixtures *Vaishali V. Agte, Medha K. Gokhale & Shashi A. Chiplonkar*

33 Microbial hazards related to rice sprouting *Valerie Piernas & Joseph P. Guiraud*

41 Effects of ice-nucleation active bacteria on the freezing of some model food systems *Jingkun Li, Martha P. Izquierdo & Tung-Ching Lee*

51 NMR studies of changes in sub-cellular water compartmentation in parenchyma apple tissue during drying and freezing *Brian P. Hills & Benoit Remigereau*

63 The influence of the temperature increase rate on the accuracy of diffusion parameters estimated under non-isothermal conditions *Teresa R. S. Brandão & Fernanda A. R. Oliveira*

73 Water recycling in processing orange peel to a high dietary fibre powder *José A. Larrauri, Bárbara Borroto & Arelys R. Crespo*

77 Simple rapid processing of African oil bean seeds for ugba production *T. G. Sokari & C. K. Wachukwu*

81 Kinetics of roasting of split chickpea (*Cicer arietinum*) *Suvendu Bhattacharya & Maya Prakash*

85 Book reviews

Volume 32 Number 2 April 1997

95 Scaling approach to water sorption isotherms of hydrogels and foods *Shimon Mizrahi, Ory Ramon, Miriam Silberberg-Bouhnik, Sigal Eichler & Yachin Cohen*

107 Analysis of operating strategies in the production of special foods in vials by freeze drying *José I. Lombraña, Carlos De Elvira & María C. Villaran*

117 Influence of chemical additives on the stability of dried tomato powder *Waqar A. Baloch, Saifullah Khan & Ahmad K. Baloch*

121 Effect of frozen storage on deep-fat fried breaded onion rings *Aristippos Gennadios, Milford A. Hanna & Du Ling*

127 Effect of fermentation and drying conditions on the quality of rooibos tea *Elizabeth Joubert & Ockert T. de Villiers*

135 A small-scale rotary fermentation unit for rooibos tea *Elizabeth Joubert & Rikus Müller*

141 Effects of gas atmosphere, antimicrobial dip and temperature on the fate of *Listeria innocua* and *Listeria monocytogenes* on minimally processed lettuce *Gillian A. Francis & David O'Beirne*

153 Fluorescence changes in amine model systems related to fish deterioration *Santiago Aubourg & José M. Gallardo*

159 Morphological changes in tilapia muscle following freezing by airblast and liquid nitrogen methods *Yau-Ling Chen & Bonnie Sun Pan*

169 Identity and overall acceptance of two types of sour rye bread *Raija-Liisa Heiniö, Nina Urala, Jukka Vainionpää, Kaisa Poutanen & Hely Tuorila*

179 Book reviews

Volume 32 Number 3 June 1997

189 Review: Coconut milk: chemistry and technology *Chee C. Seow & Choon N. Gwee*

203 Properties of a thermal-processed beverage prepared from roasted partially defatted peanuts *Margaret J. Hinds, Larry R. Beuchat & Manjeet S. Chinnan*

213 Effect of 'ropy' strains of *Lactobacillus delbrueckii* ssp. *bulgaris and Streptococcus thermophilus* on rheology of stirred yogurt *Helen L. Rawson & Valerie M. Marshall*

221 Comparative effects of gamma irridation and ozone treatment on hygienic quality of aloe powders *Myung-Woo Byun, Hong-Sun Yook & Oh-Jin Kwon*

229 Benzoyl chloride modified ionomer films as antimicrobial food packaging materials *Yih-Ming Weng, Min-Jane Chen & Wenlung Chen*

235 Effective water diffusivity in deep-fat fried restructured potato product *Eli J. Pinthus, R. Paul Singh, Moshe Rubnov, & I. Sam Saguy*

241 Velocity field in a twin-screw extruder *Serafim Bakalis & Mukund V. Karwe*

255 Seasonal changes and preliminary characterization of cathepsin D-like activity in sardine (*Sardina pilchardus*) muscle *M. Carmen Gómez-Guillén & Irineu Batista*

261 Book reviews

269 Erratum

Volume 32 Number 4 August 1997

271 Tailor-made porous solid foods *Dorit Rassis, Amos Nussinovitch & Israel S. Saguy*

Volume Contents

279 Comparison of the sensory profiles of regular and reduced-fat commercial processed cheese spreads *D. Donald Muir, Simon A. R. Williams, Adnan Y. Tamime & M. E. Shenana*

289 Comparative evaluation of the olive oil given by a new processing system *Alfonso Ranalli, Gabriella De Mattia & Maria L. Ferrante*

299 Paddy husk support and rice bran for the production of glucoamylase by *Aspergillus niger* *Vasanthy Arasaratnam, Ketheeswary Mylvaganam & Kandiah Balasubramaniam*

305 Influence of recovery conditions on apparent heat resistance of *Bacillus stearothermophilus* spores *Mercedes López, Isaac González, Margarita Mazas, Josefa González, Roberto Martin & Ana Bernardo*

313 Establishing processing conditions for canning cowpea seeds in tomato sauce *Kehinde A. Taiwo, Charles T. Akanbi & Obafemi O. Ajibola*

325 Influence of processing on the extension of shelf-life of Nagli-fish (*Sillago sihama*) by gamma radiation *Ismail O. Ahmed, Madhavesh D. Alur, Annapurna S. Kamat, Jayant R. Bandekar & Paul Thomas*

333 Use of cysteine to remove mercury from shark muscle *Isabel C. M. Aizpurúa, Alfredo Tenuta-Filho, Alice M. Sakuma & Odair Zenebon*

339 Assessment of shelf-life of maricultured gilthead sea bream (*Sparus aurata*) stored in ice *Vasiliki R. Kyrana, Vladimiros P. Lougovois & Dimitrios S. Valsamis*

349 Book reviews

Volume 32 Number 5 October 1997

355 NMR imaging of the wheat grain cooking process *Andrew G. F. Stapley, Thomas M. Hyde, Lynn F. Gladden & Peter J. Fryer*

377 The effect of sugars on the diffusion of water in starch gels: a pulsed field gradient NMR study *Imad A. Farhat, Edouard Loisel, Pedro Saez, William Derbyshire & John M. V. Blanshard*

389 Estimating the initial freezing point of foods from composition data *Christopher A. Miles, Zbynêk Mayer, Michael J. Morley & Milan Houška*

401 Effect of industrial processing on the mineral content of white asparagus *M. A. Amaro, G. Zurera, R. Moreno & C. Cañal*

407 The increase of CO_2 permeability of paper packaging with increasing hydration *Stéphane Desobry & Joël Hardy*

411 Combined effects of *Lactobacillus casei* inoculum, modified atmosphere packaging and storage temperature in controlling *Aeromonas hydrophila* in ready-to-use vegetables *Marisa Vescovo, Gianluigi Scolari, Carla Orsi, Milena Sinigaglia & Sandra Torriani*

421 Susceptibility of minimally processed green pepper and cucumber to chilling injury as observed by apparent respiration rate *Jun Soo Kang & Dong Sun Lee*

427 Changes in lipids during different sterilizing conditions in canning albacore (*Thunnus alalunga*) in oil *Santiago Aubourg, José M. Gallardo & Isabel Medina*

433 Book reviews

Volume 32 Number 6 December 1997

437 Editorial *Derek Land*

439 Properties of spray-dried and freeze-dried faba bean protein concentrates *I. Otegui, A. Fernández-Quintela, A. De Diego, C. Cid, M. T. Macarulla & M. A. Partearroyo*

445 Modelling shrinkage and porosity during vacuum dehydration *Magdalini K. Krokida, Nikolaos P. Zogzas & Zacharias B. Maroulis*

459 Water sorption isotherms of freeze-dried milk products: applicability of linear and non-linear regression analysis in modelling *Kirsi Jouppila & Yrjös H. Roos*

473 A differential scanning calorimetry study of wheat grain cooking *Andrew G. F. Stapley, Lynn F. Gladden & Peter J. Fryer*

487 Optimization of baking parameters of part-baked and rebaked Irish brown soda bread by evaluation of some quality characteristics *Renata G. K. Leuschner, Michael J. A. O'Callaghan & Elke K. Arendt*

495 The extractable β-carotene content of *Guku* (*Bidens pilosa*) leaves after cooking, drying and storage *Mudadi A. N. Benhura & Irene C. Chitsiku*

501 Effect of production factors and ripening conditions on the characteristics of Serra cheese *Angela C. Macedo, F. Xavier Malcata & Jorge C. Oliveira*

513 Improving the nutritional value of wheat bran by a white-rot fungus *Gabriella Di Lena, Elvira Patroni & G. B. Quaglia*

521 Safety assessment of genetically engineered yeast: elimination of mutagenicity of the yeast *Saccharomyces cerevisiae* by decreasing the activity of methylglyoxal synthase *Wataru Hashimoto, Tomoko Inose, Keiko Masuda & Kousaku Murata*

527 Tomato purèe quality from transgenic processing tomatoes *Sebastiano Porretta & Giovanna Poli*

535 The use of microbial metabolites against post-harvest diseases of Longan fruit *Yueming Jiang*

539 Comparison between an odour profile and a flavour profile of dry fermented sausages *Sylvie Rousset-Akrim, Jean-François Martin, Marie-Christine Bayle & Jean-Louis Berdagué*

547 Fatty acid composition in ocean-ranched Atlantic salmon (*Salmo salar*) *Ásbjörn Jónsson, Heiða Pálmadóttir & Kristberg Kristbergsson*

553 The applicability of the GAB model to food water sorption isotherms *Piotr P. Lewicki*
